Summary — Full Stack Developer with experience building scalable applications using **Java, Spring Boot, and React**. Skilled in developing **microservices**, optimizing **database performance**, and delivering responsive frontend interfaces for data-intensive systems. Strong foundation in API design, system performance, and end-to-end feature ownership in FinTech environments.

Skills

Languages: Java, Python, SQL, JavaScript

Backend: Spring Boot, Spring MVC, Spring Data JPA, Hibernate, Node.js, Express.js

Frontend: React.js, Redux, HTML5, CSS3, Tailwind CSS

Architecture: RESTful APIs, Microservices, MVC Pattern, Asynchronous Processing

Databases: PostgreSQL, MySQL, MongoDB, Redis

Cloud & DevOps: Docker, AWS, CI/CD, Git, Maven, Postman

Experience

GrayOpus Technologies

May 2025 – Dec 2025

Software Developer Intern

- Architected and maintained **7+ Spring Boot microservices** for a FinTech platform managing **44+ lakh loan records**, serving enterprise clients including **L&T** and **PayU**.
- Streamlined backend workflows for **DND** and **Disposition Reports**, processing **10,000+ records/day** and reducing manual effort by **40%** through scheduler-driven automation.
- Delivered the **Flexi Allocation engine**, improving loan allocation accuracy by **25%** and generating **50+ daily reports** via backend logic and UI-driven controls.
- Built responsive **React + Redux dashboards** supporting **1,000+ concurrent users**, enabling real-time data visibility across platforms.
- Improved data access efficiency by optimizing **PostgreSQL queries** on **10TB+ datasets**, enhancing system scalability and performance.

Vivada Technologies

Sep 2024 – Nov 2024

Software Developer Intern

- Developed **InstaChat**, a full-stack social media application using **React Native, Expo, and Appwrite** with authentication and media-sharing features.
- Integrated scalable frontend components and backend APIs, improving application performance and responsiveness.
- Optimized API and media workflows, reducing media load time by **40%** and unauthorized access attempts by **90%**.
- Built **10+ reusable React components**, enhancing UI scalability and development efficiency.

Projects

FinTrack – Role-Based Financial Management System

GitHub | Live Demo

- Engineered a **full-stack financial platform** using **Spring Boot, Spring Security, and React**, implementing **Role-Based Access Control (RBAC)** for multi-level users.
- Designed **RESTful APIs** for **user and transaction management**, supporting CRUD operations, advanced filtering, and multi-stage approval workflows.
- Built **analytics and aggregation endpoints** to compute financial summaries, category distribution, and transaction trends using optimized queries.
- Enabled **CSV-based data export** for transaction reporting, improving usability for external analysis and tracking.

Education

Maharaja Surajmal Institute of Technology, New Delhi, Delhi

2021 – 2025

Bachelor of Technology in Computer Science

GPA: 8.7 / 10

Dehradun Public School, Ghaziabad, UttarPradesh

2019 – 2020

Central Board of Secondary Education

GPA: 9.1 / 10

Achievements

- Achieved a **3-star rating on LeetCode**, demonstrating strong problem-solving and data structures skills.
- Represented school in **5 National Handball Championships**; currently coach athletes at **Youth Handball Club**.
